IMPORTANT REMINDER: The health plan’s Medicare Advantage Medical Policies are developed to provide guidance for members and providers regarding coverage in accordance with the member Evidence of Coverage (EOC) booklet. Benefit determinations are based in all cases on any applicable EOC language and any applicable CMS policy. To the extent there may be any conflict, applicable EOC language or applicable CMS policy take precedence over the health plan’s Medicare Advantage Medical Policy.

Medicare coverage guidelines are the primary resources for medical necessity decision-making. However, decisions regarding the medical reasonableness and necessity of treatment may also be made based on accepted medical practice with the advice of a medical director. To aid with “accepted medical practice” decisions, applicable MCG™ criteria may be used to supplement the Medicare references. You may visit the MCG™ Web Site for information on purchasing their criteria, or you may contact us and we will provide a copy of the specific guideline. Based on the services rendered and the condition being treated, possible MCG™ guidelines include, but may not be limited to, those listed below.

**Inpatient Services**  
For *inpatient hospital stays for the treatment of alcoholism*:

- NCD for *Inpatient Hospital Stays for the Treatment of Alcoholism (130.1)*

**Active Treatment:**  
According to NCD 130.1, “Since alcoholism is classifiable as a psychiatric condition the “active treatment” criteria must also be met in order for alcohol rehabilitation services to be covered under Medicare.” Therefore, the following are references regarding “active treatment”:

  "Payment for IPF services is to be made only for 'active treatment' that can reasonably be expected to improve the patient's condition… For services in an IPF to be designated as active treatment, they must be:

- Provided under an individualized treatment or diagnostic plan (for

<tr>
<td></td>
<td>• Reasonably expected to improve the patient's condition or for the purpose of diagnosis <em>(for further information about patient condition improvement, see Section 30.3.2 in the following link: §30.3.2 - Services Expected to Improve the Condition or for Purpose of Diagnosis)</em>; and</td>
</tr>
<tr>
<td></td>
<td>• Supervised and evaluated by a physician <em>(for further information about physician supervision requirements, see Sections 30.2.2 and 30.2.2.1 in the following link: §30.2.3 – Services Supervised and Evaluated by a Physician)</em>.</td>
</tr>
</tbody>
</table>

*(Medicare Benefit Policy Manual. Chapter 2 - Inpatient Psychiatric Hospital Services, §30.2.2 – Active Treatment and §30.2.2.1 - Principles for Evaluating a Period of Active Treatment)*

**Note:** Please read all applicable sections and subsections, in their entirety, for complete criteria details, including what may or may not be considered “active treatment” or a reasonable and necessary Medicare-covered IPH service.

For the *Treatment of Drug Abuse (Chemical Dependency)*:

- NCD for *Treatment of Drug Abuse (Chemical Dependency)* *(130.6)*

According to the NCD 130.6:
“...the intensity and duration of treatment for drug abuse may vary (depending on the particular substance(s) of abuse, duration of use, and the patient’s medical and emotional condition) from the duration of treatment or intensity needed to treat alcoholism.

“...when it is medically necessary for a patient to receive detoxification and/or rehabilitation for drug substance abuse as a hospital inpatient, coverage for care in that setting is available. Coverage is also available for treatment services that are provided in the outpatient department of a hospital to patients who, for example, have been discharged from an inpatient stay for the treatment of drug substance abuse or who require treatment but do not require the availability and intensity of services found only in the inpatient hospital setting. The coverage available for these services is subject to the same rules generally applicable to the coverage of outpatient hospital services. (See the Medicare Benefit Policy Manual (BPM), Chapter 6, “Hospital Services Covered Under Part B,” §§20.) The services must also be reasonable and necessary for treatment of the individual’s condition. (See the Medicare BPM, Chapter 16, “General Exclusions from Coverage,” §90.) Decisions regarding reasonableness and necessity of treatment, the need for an inpatient hospital level of care and length of treatment, should be made by A/B Medicare Administrative Contractors (MACs) based on accepted medical practice with the advice of their medical consultant.”

The above Medicare criteria may be supplemented by the following MCG™ guideline(s). However, MCG™ guidelines are not required for use. Visit the MCG™ Web Site for information on purchasing their criteria, or you may contact us and we will be happy to provide you with a copy of the specific guideline:

**Partial Hospitalization Program (PHP)**

"Partial hospitalization is a distinct and organized intensive treatment program for patients who would otherwise require inpatient psychiatric care." *(Medicare Benefit Policy Manual, Chapter 6, §70.1.B – Partial Hospitalization)*

**What is a Partial Hospitalization Program (PHP)?**

"Partial hospitalization programs (PHPs) are structured to provide intensive psychiatric care through active treatment that utilizes a combination of the clinically recognized items and services described in §1861(ff) of the Social Security Act (the Act). The treatment program of a PHP closely resembles that of a highly structured, short-term hospital inpatient program. It is treatment at a level more intense than outpatient day treatment or psychosocial rehabilitation." *(Medicare Benefit Policy Manual, Chapter 6, §70.3 - Partial Hospitalization Services)*

**General Criteria:**

Medicare Benefit Policy Manual, Chapter 6 - Hospital Services Covered Under Part B, §70 - Outpatient Hospital Psychiatric Services

*See Sections 70.3 and 70.3.A in the following links:*

- §70.3 - Partial Hospitalization Services
- §70.3.B - Patient Eligibility Criteria

**Note:** Please review all of Section 70.3, in its entirety, for complete criteria details, including what may or may not be considered Medicare-covered PHP services.

*The above Medicare criteria may be supplemented by the following MCG™ guideline(s). However, MCG™ guidelines are not required for use. Visit the MCG™ Web Site for information on purchasing their criteria, or you may contact us and we will be happy to provide you with a copy of the specific guideline:*
