Positional Magnetic Resonance Imaging (MRI)

Published: 04/01/2018

IMPORTANT REMINDER

The Medicare Advantage Medical Policy manual is not intended to override the member Evidence of Coverage (EOC), which defines the insured’s benefits, nor is it intended to dictate how providers are to practice medicine. Physicians and other health care providers are expected to exercise their medical judgment in providing the most appropriate care for the individual member.

The Medicare Advantage Medical Policies are designed to provide guidance regarding the decision-making process for the coverage or non-coverage of services or procedures in accordance with the member EOC and the Centers of Medicare and Medicaid Services (CMS) policies, when available. In the event of a conflict, applicable CMS policy or EOC language will take precedence over the Medicare Advantage Medical Policy. In the absence of CMS guidance for a requested service or procedure, the health plan may apply their Medical Policy Manual or MCG™ criteria, both of which are developed with an objective, evidence-based process using scientific evidence, current generally accepted standards of medical practice, and authoritative clinical practice guidelines.

Medicare and EOCs exclude from coverage, among other things, services or procedures considered to be investigational, cosmetic, or not medically necessary, and in some cases, providers may bill members for these non-covered services or procedures. Providers are encouraged to inform members in advance when they may be financially responsible for the cost of non-covered or excluded services.

DESCRIPTION

Positional magnetic resonance imaging (MRI) is an imaging technique which allows imaging of a patient in various positions, including sitting and standing. This technology is currently being investigated for use in the diagnosis of patients with position-dependent back pain. Positional MRI is also referred to as standing, seated, weight bearing, vertical, or upright MRI.

MEDICARE ADVANTAGE POLICY CRITERIA

<table>

<tbody>
<tr>
<td>National Coverage Determinations (NCDs)*</td>
<td>See References(1)</td>
</tr>
</tbody>
</table>

NCD guidelines state coverage eligibility for all uses of MRI not specifically addressed as covered or non-covered by CMS are determined by individual local
contractor discretion. Positional or upright MRIs are not addressed within the NCD.

**NOTE:** If a procedure or device lacks scientific evidence regarding safety and efficacy because it is investigational or experimental, the service is noncovered as not reasonable and necessary to treat illness or injury. ([Medicare IOM Pub. No. 100-04, Ch. 23, §30.A](https://www.cms.gov)). According to Title XVIII of the Social Security Act, §1862(a)(1)(A), only medically reasonable and necessary services are covered by Medicare. In the absence of a NCD, LCD, or other coverage guideline, CMS guidelines allow a Medicare Advantage Organization (MAO) to make coverage determinations, applying an **objective, evidence-based process, based on authoritative evidence.** ([Medicare IOM Pub. No. 100-16, Ch. 4, §90.5](https://www.cms.gov)). The Medicare Advantage Medical Policy - Medicine Policy No. M-149 - provides further details regarding the plan’s evidence-assessment process (see Cross References).

**POLICY GUIDELINES**

**REGULATORY STATUS**

Several MRI systems have 510(k) marketing clearance from the U.S. Food and Drug Administration (FDA) as open or total body systems for positional MRI scans, including but not limited to the Upright™ MRI (formerly Stand Up MRI™, FONAR Corporation).

**CODING**

**NOTE:** There is no specific code for positional MRI, which should be reported with an unlisted procedure code such as 76498.
