

***New and Emerging Medical Technologies and Procedures***

**Effective:** January 1, 2023

**Next Review:** December 2023

**Last Review:** November 2022

**IMPORTANT REMINDER**

Medical Policies are developed to provide guidance for members and providers regarding coverage in accordance with contract terms. Benefit determinations are based in all cases on the applicable contract language. To the extent there may be any conflict between the Medical Policy and contract language, the contract language takes precedence.

PLEASE NOTE: Contracts exclude from coverage, among other things, services or procedures that are considered investigational or cosmetic. Providers may bill members for services or procedures that are considered investigational or cosmetic. Providers are encouraged to inform members before rendering such services that the members are likely to be financially responsible for the cost of these services.

**MEDICAL POLICY CRITERIA**

The following are new and emerging medical technologies which are considered **investigational** because the current scientific evidence is not yet sufficient to establish the impact of these technologies on health outcomes:
